IDEATION PHASE — DEFINE PHASE

Define Problem Statements Template

Date	29 October 2026	Maximum Marks	2 Marks
Team ID	EV-BI-04	Project Name	Electric Vehicle Market Performance Insights

Customer Problem Statement Template:
Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love. A well-articulated customer problem statement allows your team to find the ideal solution for the challenges your customers face.

Customer Problem Statement Framework

I am *Who are they?*	Potential EV Buyers, Business Analysts, & Industry Stakeholders looking for clean transport & market intelligence.
I'm trying to *What is their goal?*	Compare vehicle specs (battery, price, range) and analyze overall market performance in one place.
But *What bothers them most?*	Information is fragmented across multiple sources, and centralized market trends are hard to visualize.
Because *What needs to be solved?*	Existing tools lack combined insights covering technical battery data, sales performance, and consumer satisfaction.
Which makes me feel *Emotional impact?*	Confused, overwhelmed by conflicting data, and hesitant to make major purchasing or business investment decisions.

Detailed Problem Statements & Solutions

PS No.	I am (Customer)	I'm trying to	But (Problem)	Why it matters	Solution
PS-1	EV Consumer / Buyer	Compare EV models (battery capacity, range, price, ratings).	Information is scattered across multiple unverified websites.	Without clear comparison, buyers may pick unsuitable EVs leading to poor decisions.	Interactive Tableau Dashboard with filters & performance metrics.
PS-2	EV Manufacturer & Business Analyst	Track market trends, regional sales, and consumer preferences.	Lack of a centralized real-time view of market dynamics.	Makes it difficult to identify growth opportunities and data-driven strategy.	Business Intelligence Dashboard visualizing sales, share & reviews.
PS-3	Researcher & Policy Maker	Analyze battery technologies, charging infrastructure & sustainability.	Limited access to organized, easy-to-digest industry metrics.	Unorganized data slows research, city planning, and policy development.	Research Dashboard detailing battery types (LFP, NMC, Solid-State) & CO_2 metrics.

🎯 **Expected Outcomes**

- Easy, single-window comparison of electric vehicle models.
- Enhanced business decisions using consolidated market analytics.
- Improved understanding of EV growth trends, infrastructure, and battery advancements.
- Interactive Tableau dashboards tailored for consumers, researchers, and executives.
