IDEATION PHASE — EMPATHIZE & DISCOVER

Empathy Map Canvas

Date	29 October 2026	Maximum Marks	4 Marks
Team ID	EV-BI-04	Project Name	EV Market Performance & BI Dashboard

Empathy Map Canvas:
An empathy map is a simple, easy-to-digest visual that captures knowledge about a user's behaviours and attitudes. It helps teams better understand their users by viewing things from their perspective, goals, and challenges to build a customer-centric solution.

🗣️ SAYS

- I want reliable and affordable electric vehicles.
- I need accurate information before making a purchase.
- I want to compare EV models easily.
- I am interested in battery performance and charging time.
- I need market trends to make better business decisions.

💭 THINKS

- Which EV offers the best value for money?
- Will charging infrastructure improve in the future?
- Is battery technology reliable for long-term use?
- Which manufacturers are leading the EV market?
- Is investing in the EV industry profitable?

PERSONA

EV Buyers, Analysts, Manufacturers, Authorities & Investors

🎯 DOES

- Compares different EV models.
- Studies dashboards and market reports.
- Checks customer ratings and reviews.
- Analyzes battery specifications and pricing.
- Monitors market growth and future trends.

❤️ FEELS

- Excited about sustainable transportation.
- Curious about new EV technologies.
- Confused by the large number of available options.
- Concerned about charging availability and battery life.
- Hopeful that EV adoption will reduce pollution.

😟 PAINS

- Limited charging stations in some areas.
- High initial purchase cost.
- Lack of awareness about EV features.
- Battery replacement concerns.
- Difficulty comparing multiple vehicle specifications.

🌟 GAINS

- Easy comparison of EV models.
- Better understanding of market performance.
- Data-driven investment decisions.
- Insights into customer preferences.
- Knowledge of future EV trends and sustainable transportation.
